RANSOME and PARSONS beg to draw the attention of Architects, Builders, and others, to their PATENT STONE, which in its composition, differs essentially from all other artificial productions for a similar purpose—Plaster forming the basis. In character, texture, and appearance it is made to resemble every kind of natural stone, at pleasure, from the finest marble to the coarsest conglomerate, and is pierced all their valuable and enduring properties, without being liable to any of their defects. It is especially applicable to all kinds of architectural decorations and mouldings, fronts, balconies for terrace walls, verandahs, steps, &c.; also for all varieties of plain and ornamental paving. In price it is far below that of any natural product, and, in many cases, can be furnished at less an ordinary cement. Copies of Busts, Statuary, or other Works of Art, can be produced in the finest Patent Stone as faithfully as in Plaster of Paris.
IMPORTANT to WATER COMPANIES, MANUFACTURERS, and the PUBLIC.—RANSOME and PARSONS beg to call the attention of Water Companies, Manufacturers, and others to their PATENT STONE FILTERING SLABS, which are capable of filtering from 100 to 200 gallons of water per superficial foot per day, with a head of water varying from 2 to 4 feet. These slabs can be produced to any required dimensions, and consequently, can be adapted to any cisterns, tank, or reservoirs. By a simple but ordinary arrangement, they are prevented from being in any way choked or impeded in their action. Price 2s. per superficial foot.—Full descriptions and prices of their other descriptions of Stone will be supplied on application.
IMPORTANT to BRICK MAKERS and CONTRACTORS.—RANSOME and PARSONS are also the proprietors of HALL'S PATENT BRICK-MAKING MACHINE, capable of moulding 15,000 bricks per day and upwards, which are superior to those manufactured by hand, and are produced at considerably less cost. Communications to be addressed to the Patentees—Messrs. RANSOME and PARSONS, Flint Wharf, Ipswich; or to 169, Strand-street, London.

PORTLAND STONE from the best quarry, Hare Hill, Whitsmouth, York, and other STONE in general use, either in BLOCK, LANDINGS, or SLABS. SINKS, GRANITE CURB &c.
JOHN HOLMES, Agent.

FRENCH PLASTER mixed with sand forms a hard stucco for internal walls, which dries rapidly, and may be used with advantage in place of lime and hair, at a trifling increase of cost. It is stronger for ranged work than Keene's plaster, and is cheaper in its first cost.—Importers and Manufacturers, J. B. WHITE and SONS, Millbank-street, Westminster.

ATKINSON'S CEMENT, made in London from the Stone supplied from the Mulgrave estate is well known for its quick setting properties and fine natural colour, which have distinguished it for many years as the best cement for Casting and all ornamental purposes.—Manufacturers, J. B. WHITE and SONS, Millbank-street, Westminster.

KEENE'S and PARIAN CEMENT, for internal stucco, are employed very advantageously in place of wood for skirtings, architraves, and panel mouldings, and for its door flooring, instead of stone. The peculiar property of PARIAN Cement allow of its being painted or papered two or three within a few hours of its application, and these render it as a portland substitute for common plastering in those cases where a position and beauty of finish are essential.—J. B. WHITE and SONS, Millbank-street, Westminster, Patentees of KEENE'S Cement, Licensees of PARIAN Cement.

J. B. WHITE and SONS advise purchasers of PORTLAND CEMENT to ascertain if an article not selling under that name at a reduced price be the real Portland Cement or a spurious imitation of it in the shape of a Lias Lime.

PORTLAND CEMENT, as manufactured by J. B. WHITE and SONS, possesses all the properties of the best Roman Cement, but has the advantage over these cements of wholly resisting frost. When used as a stucco, it does not require to be worn green in damp situations, and requires no colouring. Employed as an hydraulic mortar for brickwork, it sets in four to five minutes after the addition of cement, and is proved by trial to be harder and stronger than the Roman Cement with but one moment of mixing. Its superior setting power, combined with its eminently hydraulic properties, point it out as the finest material for building on and rendering walls, the lining of reservoirs, cisterns, and baths, and for all those purposes where strength and a perfect resistance to water are required.
Manufacturers—J. B. WHITE and SONS, Millbank-street, Westminster, and 26, Basil-street, Liverpool.

PORTLAND CEMENT, in Casks of Four Imperial Bushels. QUANTITY, NOT WEIGHT, BEING THE STANDARD.—CHAS. FRANCIS and SONS, Cement Works, Nine Elms, London.

PORTLAND CEMENT, solely MANUFACTURED by WILLIAM ASPDIN, &c., the Patentee.—Messrs. ROBINS, ASPDIN, and Co. report, from 1st to 7th inst., 2,000 casks; 8th, 9th, 10th, 11th, 12th, 13th, and 14th inst., 2,000 casks; and 15th, 16th, 17th, and 18th inst., 2,000 casks, of "The Builder," for statements of EXPERIMENTS on the strength of Portland Cements, whereby the great superiority of their Cement is manifest. This Cement has been proved for upwards of twenty years in the Thames Tunnel to resist the action of water; it is stronger in its cementitious qualities, harder, and more durable than any other description of Cement. It does not vegetate, crystalize, or burn green; nor is it affected by any atmospheric influence whatever the climate, resisting alike the action of frost and heat. It is manufactured to set in from five to sixty minutes. For all purposes that Cement is acknowledged the Proprietors challenge competition. Orders received by Messrs. ROBINS, ASPDIN, and Company, at their Manchester Warehouse, Kent, and their Wharf, Great Scotland-yard, Whitehall, also at their Depôt, 48, Hanover-street, Liverpool.

PORTLAND CEMENT.—FREEMAN, South Wharf, Paddington, and RICHARDSON have much pleasure in introducing to the trade the above superior CEMENT, being of uniform colour and quality in deddendum never before attained in Portland Cements. It possesses extraordinary cementitious qualities, resists the action of frost and heat, and is more durable than any other Cement; does not vegetate, burn green, or crystalize; and with which the eminent hydraulic properties stamp it at once as the first Cement of the day for work where all the above qualities are requisite. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto had the monopoly. Manufactured by G. GREAVES, Esq. at his Works, near the River Aire, and exported to all parts of the Kingdom per boat or rail, at a reduced price to the trade.

THE GREAT EXHIBITION OF INDUSTRY OF ALL NATIONS.
MARTIN'S PATENT FIREPROOF AND ORNAMENTAL CEMENT.
MESSRS. STEVENS and SON beg to call the attention of Architects, Builders, &c., to a specimen of MARTIN'S CEMENT in Keene's plain and ornamental coatings, &c., in the GREAT EXHIBITION, 21, SOUTH WALL, CLASS 28, and to secure their friends and the public that work when executed in cement manufactured by them can be completed at a cost of full 50 per cent. less than other cements of a similar description. This cement may be obtained of Messrs. STEVENS and SON, at their plaster and cement works, 186, Drury-lane, or at their manufactory, Derwent Mill, Derby.—N.B. This Cement will receive PAINT OR PAPER IN A FEW HOURS AFTER THE COMPLETION OF THE WORK.

JOHNS and CO.'S
PATENT PERMANENT STUCCO WASH,
WITHOUT SIZE OR OTHER CORRUPTIBLE INGREDIENT.
JOHNS and CO. having effected some important improvement in the manufacture of this very useful material, confidently direct to the notice of the Trade and the Public generally, as possessing every advantage over the common Lime Wash or Cement for STUCCO or BRICK WORK. It is to Stone Colour, but may be tinted to any other—DOES NOT WASH OFF—is perfectly dry in twenty-four hours, and, being a non-absorbent, is admirably adapted for Railway Stations, Union Workhouses, Barracks, Schools, Prisons, &c. One coat will cover 300 square yards. It will keep good for years, and MAY BE EXPORTED WITH PERFECT SAFETY.
JOHNS and CO.'S STUCCO CEMENT.—This material, from the great reduction in price, and its suitableness for internal as well as external surfaces, places it above all other materials of the kind; it has no caustic qualities; may be painted or papered in a few days; never blisters, cracks, or repeddens; sets hard as stone; and, may be cleaned with a brush and water.
The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials, prospectuses, and every information may be obtained, on application to the Sole Agent, PHILIP HARDING, 28, Wardrobe-pl., 28, Doctors-commons, Upper Thames-street. A liberal allowance to wholesale dealers.
